MOBILE TOILET VAN

Trailer-Mounted Sanitation Units for Municipal & Public Infrastructure Projects

About Hridaya by iSell

iSell is a prefabrication manufacturing company based in Jaipur, Rajasthan, operating under the brand **Hridaya** for over 9 years. We design and manufacture prefab container houses, mobile toilet vans, portable washroom units, MS dustbins, water tankers, sewage suction & jetting units, and cow catcher vehicles — serving contractors and municipal government clients (PWD and local bodies) across Rajasthan and beyond.

Why Hridaya Mobile Toilet Vans

- **Built for Indian municipal conditions** — rugged MS chassis, weather-resistant PUF panel cabins, road-towable on any standard trailer hitch.
- **Zero civil work** — fully self-contained with onboard water storage and waste collection; deploy and relocate without masonry or plumbing contractors.
- **Factory-finished quality** — ISO 9001:2015 certified manufacturing process from our Jagatpura, Jaipur facility.
- **Tender-ready documentation** — GeM registered, Udyam/MSME certified, full compliance paperwork for government procurement.

ISO 9001:2015 **GeM REGISTERED** **UDYAM MSME**
9+ YEARS EXPERIENCE

Product Overview

Our Mobile Toilet Van is a fully prefabricated, trailer-mounted sanitation unit designed for rapid deployment at construction sites, public events, religious gatherings, highway rest stops, and as permanent or semi-permanent municipal public conveniences under Swachh Bharat and government sanitation programs.

Rear view — twin stainless steel wash basins with underslung water tank, tandem axle chassis

Available Configurations

- 4-Cubicle unit (as shown) — compact deployment
- 6-Cubicle unit — higher footfall sites
- Gender-segregated (पुरुष / महिला) layouts on request
- Indian pan, Western WC, or mixed configurations

Standard Inclusions

- Overhead/underslung water storage tank
- External wash basins with taps
- Steel-deck walkway with safety railing
- Interior LED lighting, door latches

Exterior Views

Side elevation — cubicle doors onto walkway

Front quarter view

Full side profile on chassis

Deployed Units — Custom Livery

Units can be finished in your department's official color scheme with hand-painted signage, department name, and government awareness campaign artwork (e.g. Beti Bachao Beti Padhao) as shown below.

6-cubicle unit finished in custom livery with mural panel

Interior & Cubicles

Each cubicle is individually partitioned with a lockable door, interior LED point, and gender signage. Pan type (Indian/Western) is configured per cubicle as per client requirement.

Interior Specification

- Partition walls — 50mm PUF sandwich panel, color-coated steel skin both sides
- Floor — checkered MS sheet / FRP anti-skid flooring
- Door — steel-skin shutter door, latch + bolt lock
- Lighting — LED point per cubicle, switch-operated
- Ventilation — exhaust vent / roof vent per unit

Water Supply & Washbasin System

Every unit carries its own onboard water supply — no external plumbing connection required at the deployment site. An underslung polymer water tank feeds twin external wash basins and the internal flush points by gravity.

Water System Features

- Underslung Nircon-brand polymer tank, plus overhead storage tank on the front access platform
- Manual ball-valve tank drain for cleaning/winterizing
- Twin stainless steel wash basins, external mount
- Individual basin taps, gravity-fed
- SWR waste piping with trap per fixture
- Can be refilled via tanker or municipal line when parked

Rear view — twin steel wash basins over the underslung tank

Chassis & Mobility

Running Gear

- Heavy-duty MS channel flatbed chassis
- Tandem / twin-axle running gear with leaf springs
- Tow-hitch drawbar — compatible with any standard towing vehicle
- Road-worthy pneumatic tyres

Relocation

The entire unit is designed to be towed to a new site without dismantling — ideal for seasonal deployments, rotating construction sites, event grounds, and temporary municipal sanitation drives. No crane or special transport required for short-distance relocation.

Suspension, Underframe & Drawbar

Leaf-spring suspension with welded hanger brackets and cross-member

Underslung polymer tank with SWR waste piping and ball-valve outlet

Triangulated drawbar with tow eye, twin-axle running gear

- 750-16, 16-ply truck-type tyres on MS wheel rims
- Leaf-spring suspension with heavy hanger brackets welded to the main frame
- Triangulated MS drawbar with tow eye for standard truck or tractor hitch

Construction Specification

Component	Specification
Main Frame	MS channel / square tube, fully welded, factory-painted
Walls	50mm PUF sandwich panel, color-coated steel skin both sides
Roof	Color-coated steel sheet, overhang for weather protection, slope for rainwater runoff
Flooring	Checkered MS sheet / FRP anti-skid flooring, welded to frame
Doors	Steel-skin shutter doors with latch + bolt lock, per cubicle
Walkway	Steel deck with MS pipe railing, external access steps
Water Tank	Nircon polymer tank, underslung mount, ball-valve drain
Plumbing	SWR waste piping, PVC supply lines, trap per fixture
Electrical	LED lighting per cubicle, switch-operated; exhaust vent
Finish/Paint	Weather-resistant enamel/PU paint; custom colour and signage on request
Chassis	MS channel flatbed, tandem axle, tow-hitch drawbar

Technical Specifications

Parameter	4-Cubicle Model	6-Cubicle Model
No. of cubicles	4	6
Pan type	Indian / Western (as specified)	Indian / Western (as specified)
Overall length	~14-16 ft (cabin)	~18-20 ft (cabin)
Overall width	~7-8 ft	~7-8 ft
Wash basins	2 external	2-4 external
Water tank capacity	500-1000 L	1000-1500 L
Chassis axles	Tandem (2-axle)	Tandem (2-axle)
Access	Walkway + steps	Walkway + steps
Signage/branding	Custom paint, department name, mural art	Custom paint, department name, mural art

Dimensions and inclusions are configurable per project / tender requirement. Contact us for a BOQ matched to your exact specification.

Customization Options

Available Customizations

- Cubicle count (4, 6, 8, 10-seater — see our large-format trailer unit)
- Pan type mix — Indian, Western, or combination
- Exterior paint colour and department branding
- Hand-painted mural panels / government scheme artwork
- Gender-segregated layouts with Hindi/English signage
- Solar panel + battery for off-grid lighting
- Additional wash basins or hand-wash stations

We work directly with PWD and local government departments to match unit branding to local government scheme requirements (Swachh Bharat, Beti Bachao Beti Padhao, and department-specific signage).

Applications

Government & Municipal

- Public sanitation (Swachh Bharat Mission)
- PWD road-side rest areas
- Railway station / bus stand forecourts
- Government camps and relief deployments

Commercial & Industrial

- Construction site worker sanitation
- Factory / industrial estate temporary toilets
- Mining and infrastructure project sites

Events & Public Gatherings

- Religious fairs and melas
- Weddings and large private events
- Political rallies and public functions
- Sporting events and exhibitions

Quality & Certifications

Certification	Details
ISO 9001:2015	Quality Management System — Certificate No. 305025070816Q, certified by QRO
Udyam / MSME	UDYAM-RJ-17-0050423 (Micro Enterprise, Manufacturing)
GeM Registration	Seller ID JO3Q210001932183 — eligible for direct government e-procurement
GST Registration	08AJFPC1364D1ZQ

Our Manufacturing Scope (ISO)

Manufacturer of garbage rickshaws, bicycles, tricycles, portable toilets, mobile toilets, MS fabrication, FRP sheds, and FRP cabins under the Hridaya brand — all produced at our own facility in Jagatpura, Jaipur, with in-house welding, panel fabrication, and finishing.

Built for Government Tenders

As a GeM-registered OEM, we routinely supply portable and mobile toilet units against government tenders for municipal bodies, PWD, defence establishments, and PSU buyers. We can furnish:

- OEM self-declaration and manufacturer authorisation
- ISO 9001:2015 certificate and quality documentation
- BOQ compliance statements matched to tender specification
- Udyam/MSME certificate for MSE purchase preference
- Past performance and delivery references
- Pre-dispatch and post-receipt inspection support

Typical Delivery

Standard units are manufactured to order from our Jaipur facility; lead time and delivery terms are confirmed per tender/PO requirement. We have supplied under GeM tenders to buyers including GAIL group companies, BPCL terminals, and Indian Army engineering units.

Why Choose Hridaya by iSell

9+ Years of Manufacturing

A decade of hands-on prefab fabrication experience, specializing in mobile sanitation and municipal infrastructure products.

Government-Ready Compliance

ISO, GeM, and MSME certifications in place, with tender documentation support for municipal and PSU buyers.

In-House Fabrication

Full control over quality — framing, panel work, plumbing, and paint finishing all done at our own Jagatpura facility, not outsourced.

Custom Configurations

From 1-seater FRP portable units to 10-seater trailer-mounted blocks, each unit is built to your cubicle count, finish, and branding requirement.
